

I have utilized Lakefront Airport facilities for 50 years both as a tenant and transient passing through. For the past several years, I have worked Special Events for Million Air New Orleans. In my view, the operation of this facility has been exemplary and above reproach. I have the highest regard for AOPA, Aircraft Management, LLC and other entities involved in these proceedings. It is inconceivable that a decision effecting the future of Lakefront Airport could be made without a minimum time extension of 60 days, public and private input and full FAA participation. The Commissioners of the Orleans Levee District's haste in this important matter is questionable. What are the true facts behind this rush to judgement? Thank you for this opportunity to be heard
